

Case Scenario

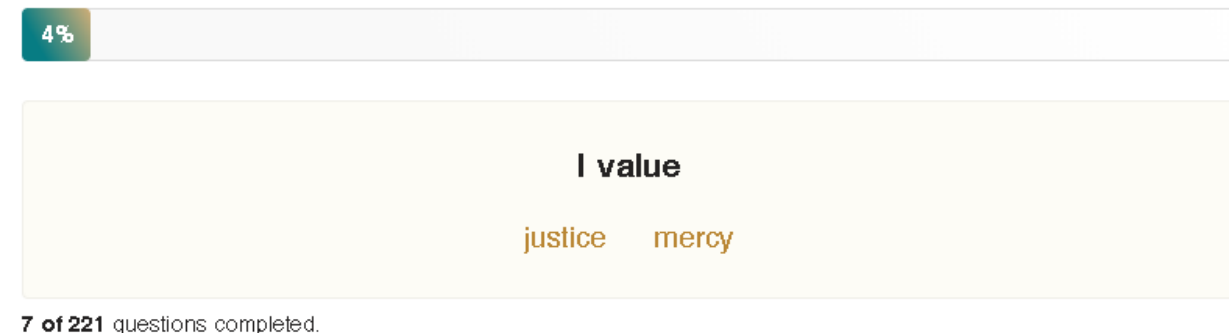

Some of the products we develop are Psychometric test and online Personality Assessment tools. To the best of your ability, code an interface that functions like the following online test using HTML5, CSS and Javascript and/or ReactJS.

Tugas pengkodean Anda adalah :

Membuat antarmuka web yang terlihat seperti layar contoh dibawah ini. Anda dapat menggunakan kombinasi apa pun dari "HTML5", "JavaScript", "CSS", atau "ReactJS" untuk membuat antarmuka web. Sebuah pertanyaan akan ditampilkan kepada pengguna dengan beberapa opsi. Setelah pengguna memilih opsi, rangkaian pertanyaan berikutnya akan ditampilkan.

Ada total 5 soal untuk tes ini.

Pertanyaan dan opsi ada di halaman 2 dan 3 dokumen ini.

The screenshot shows a web interface for a personality assessment test. At the top, there is a progress bar indicating 4% completion. Below the progress bar, a question is displayed: "I value". Underneath the question, there are two answer options: "justice" and "mercy". At the bottom of the interface, a status message reads "7 of 221 questions completed."

The simple online test will display one question at a time, with the answer options at the bottom. When the user clicks on one of the answers, it will move on to display the next question. The answer selected will be stored in a JS array to be submitted at the end of test.

Use the following sample questions and answers set to code an interface that will prompt user questions with answers options, upon answering, the next question will show. Upon every new test, the questions should randomize their order.
